

AMITHESH SEQUIERA

Mangaluru, Karnataka, 575002

☎ +91 9481057182 ✉ iamamithesh@gmail.com 💻 <https://l1nk.dev/ugm3445>

Objective

Motivated Computer Science and Cybersecurity student with a strong interest in securing systems, networking, and identifying real-world vulnerabilities. Passionate about ethical hacking and Capture The Flag (CTF) challenges, with hands-on experience in Vulnerability Assessment and Penetration Testing (VAPT). Skilled in tools like Burp Suite, Kali Linux, Wireshark, and Nmap, and driven to build secure, resilient digital infrastructures by proactively detecting and mitigating security risks.

Education

N.M.A.M. Institute of Technology

Bachelor of Technology in CS and Cyber Security (CGPA: 7.66)

Aug. 2023 – May 2027

Udupi, Karnataka

St. Aloysius Pre-University College

Pre-University Course - PCMC (Percentage: 83.83%)

2021 – 2023

Mangaluru, Karnataka

St. Aloysius High School

SSLC (Percentage: 84.48%)

2019 – 2021

Mangaluru, Karnataka

Experience

EYEQ DOT NETPVT.LTD.

Cyber Security Analyst Intern

June 2025 – August 2025

Mangaluru, Karnataka

- Collaborated with the Red Team to perform Vulnerability Assessments and Penetration Testing on live systems.
- Identified and documented security gaps using BurpSuite, Kali Linux, Wireshark, and Nmap.
- Demonstrated exploits such as HTML Injection, Clickjacking, and Broken Link Hijacking.
- Conducted reconnaissance and prepared professional security reports.
- Developed teamwork, accuracy, and ethical testing practices in a professional cybersecurity environment.

Projects

Risk-Based Multifactor Authentication System | *Node.js, Express.js, PostgreSQL, AES-256, SSS*

Nov 2025

- Designed a risk-based MFA system integrating password authentication, TOTP verification, and geolocation-based login analysis.
- Implemented AES-256 encryption, Shamir's Secret Sharing, and bcrypt hashing to secure authentication secrets and user credentials.
- Developed the system using Node.js, Express.js, and PostgreSQL with JWT-based session management for secure access control.

Access Sentinel: AI Anomaly Detection | *Python, Scikit-learn, PyTorch, SHAP, Streamlit*

Feb 2026

- Secured **3rd Place** at NITK for solving a **Saviynt-provided industry challenge** to detect identity compromise and insider threats in real-time IAM logs.
- Developed an unsupervised ML ensemble using **Isolation Forest** and **Autoencoders** to baseline behavior, achieving a robust **F1-score of 0.8+**.
- Integrated **Explainable AI (SHAP)** to visualize risk factors such as geographical velocity and temporal deviations, providing transparent alerts for security analysts.

SupplyChain-Sim: Interactive Attack Simulator | *React 18, Babel, File System API, CSS3*

April 2026

- Developed a "no-build" educational simulator in React to demonstrate dependency-based attacks (typosquatting, malicious post-install hooks) from both Attacker and Defender perspectives[cite: 3, 4, 6, 27].
- Engineered a real-world credential scanner using the **Browser File System Access API** to recursively scan local directories for leaked API keys and secrets via regex pattern matching[cite: 35, 103, 108].
- Implemented live terminal animations and a dynamic theme-switching engine to visualize data exfiltration and defensive measures like hash pinning and **pip-audit** vulnerability scans[cite: 28, 30, 50, 61].

Skills

Languages: Python, SQL, JavaScript, HTML/CSS, Java, C

Technical skills: VAPT, Threat Detection, Network Security (TCP/IP), Kali Linux, Burp Suite, Wireshark, Nmap, Git, Linux, Jenkins, GCP, Android Studio

Soft Skills: Leadership, Team Coordination, Problem Solving, Technical Report Writing, Critical Thinking, Adaptability

Achievements

- Runner-up (2nd Place) | *CyberSiege National Level CTF Hackathon*

Nov 2025

 - Emerged as runner-up among 41 teams in a 24-hour competition covering Cryptography, Steganography, PWN, Web Exploitation, OSINT, and Digital Forensics.
- 3rd Place | *Software & Systems Security Bootcamp (NITK/Savvynt)*

Feb 2026

 - Recognized for developing "Access Sentinel," an ML-based PoC detecting anomalous user behavior in real-time logs (Details in Projects section).
- Top 10 Finalist | *CySecK Cybersecurity Bootcamp CTF (NITK)*

Oct 2025

 - Ranked in the top 10 out of 300+ participants in a Capture The Flag (CTF) competition organized by the Centre of Excellence for Cybersecurity - Karnataka.

Certifications & Experience

Job Simulations: Deloitte Australia Cyber Simulation (Threat Detection & Log Analysis), Mastercard Cybersecurity Simulation (Phishing Analysis & Security Awareness Training)
Professional Certifications: Cyber Security 101 (TryHackMe), Salesforce Certified Agentforce Specialist, Hedera Hashgraph Developer, Cisco Intro to Cybersecurity
Academic Certifications: System and Usable Security (NPTEL), Cryptography and Network Security (NPTEL), Pre-Security (TryHackMe)

Leadership & Volunteer Experience

- Employment Readiness Program (ERP)

July 2024 – Present

Team Lead (2nd & 3rd Year)
Nitte, Karnataka

 - Selected to lead the program for two consecutive years, directing a team to conduct mock interviews, resume-building workshops, and technical feedback sessions for 100+ students.
- Freshers' Orientation Program

July 2024

Volunteer Team Leader (Placement Dept.)
Nitte, Karnataka

 - Led a 10-day intensive preparatory phase focusing on soft skills training and activity coordination for incoming engineering students.
 - Facilitated the two-day orientation event as a mentor and role model, enhancing student engagement and cross-year communication.
- Class Representative

2023 – 2026

Liaison (1st & 3rd Year)
Nitte, Karnataka

 - Serve as the primary link between faculty and a cohort of 60+ students, managing academic schedules and representing student interests in departmental meetings.
- University Basketball Team

2024 – 2025

Student Athlete
South Zone Tournament

 - Represented NMAMIT at the South Zone Inter-University Basketball Tournament, demonstrating excellence in teamwork, discipline, and performance under pressure.
